

1. What is an abdominal ultrasound?
2. What are the purposes of an abdominal ultrasound?
3. What medical conditions can an abdominal ultrasound help diagnose?
4. How is ultrasound used in detecting abdominal trauma?
5. Can ultrasound detect tumors or cysts in the abdomen?
6. How is liver disease diagnosed using ultrasound?
7. What role does ultrasound play in detecting pancreatic disease?
8. How are gallstones identified using ultrasound?
9. Why is ultrasound useful in diagnosing spleen injuries?
10. How can ultrasound help in diagnosing kidney diseases?
11. What is an abdominal aortic aneurysm?
12. How is ultrasound used to monitor an abdominal aortic aneurysm?
13. What are the risks associated with ultrasound procedures?
14. What precautions should patients take before an abdominal ultrasound?
15. What happens during an abdominal ultrasound procedure?
16. What are the types of ultrasound imaging (A-mode, B-mode, etc.)?
17. How is Doppler ultrasound different from standard ultrasound?
18. What are the normal results of an abdominal ultrasound?
19. What do abnormal ultrasound results indicate?
20. Can ultrasound be used as a treatment method?
21. What are accessory organs?
22. What is cirrhosis and how is it detected?
23. What are common bile ducts and why are they important?
24. What is the Doppler effect and how is it applied in ultrasound?
25. What is a CT scan and how does it compare to ultrasound?
26. What is the function of the transducer in an ultrasound machine?
27. How does piezoelectricity play a role in ultrasound?
28. What is selective abortion?
29. Why is selective abortion performed in cases of multi-fetal pregnancies?
30. What is therapeutic abortion?
31. When is partial birth abortion used?
32. What are the ethical concerns surrounding D&X (partial birth abortion)?
33. What are the side effects of selective reduction?
34. What is the procedure for therapeutic abortion?
35. What is menstrual extraction?
36. What is the morning-after pill?
37. What medications are used for early-stage medical abortion?
38. What is methotrexate and how is it used?
39. What is misoprostol and what does it do?
40. What complications can arise from late-term abortions?

41. What is the definition of viscera?
42. What are hernias and how are they related to abdominal wall defects?
43. How are abdominal wall defects diagnosed in newborns?
44. What is the prognosis after surgical repair of abdominal wall defects?
45. How can ultrasound detect abnormalities during pregnancy?
46. What is the normal frequency range for medical ultrasound?
47. What are the benefits of B-mode over A-mode ultrasound?
48. What medical fields utilize Doppler ultrasound extensively?
49. What preparation is required before undergoing an ultrasound?
50. What is the significance of jaundice in diagnosing abdominal issues?
- 51.
